

HAM-LET PRECISION INSTRUMENT PIPE FITTINGS

PIPELINE

Platinum Natural Gas Solutions

GENERAL

Our pipeline connectors range is manufactured to fit typical applications in the chemical and petrochemical, oil, gas and power generation industries.

The exposed threads of the fittings are properly covered during packaging to prevent damage during delivery.

FEATURES

- Sizes range from 1/16" to 2"
- The exposed threads of the fittings are properly covered during packaging to prevent damage during delivery.
- All pipe threads meet the requirements of ASME/ANSI B1.20.1 (1983) for tapered pipe threads (NPT).
- Working pressures are calculated in accordance with Power Piping Code ANSI B 31.1, Refiner Piping Code ASME/ANSI B 31.3 and section VIII of ASME Boiler & Pressure Vessel Code.

INSTALLATION INSTRUCTIONS

To ensure a leak-tight seal, we recommend the use of a pipe thread sealant on all NPT threads. The most effective sealing method is PTFE tape. Tape should be used only on male tapered pipe threads.

Do not use tape on flared, coned or tube fitting ends!

Clean both male and female tapered threads and wrap tape in the direction of the male tapered thread spiral.

NOTE: Two wraps are suggested for stainless steel tapered pipe threads. Make sure tape does not overhang the first thread as the tape might shred and enter the fluid system.

Cut off excess tape. The connection is now ready for proper makeup.
